SUMMARY

Senior marketing artist creating game marketing at Meta Reality Labs, YAGER and AdLiven. I make key art, video ads, trailers, in-engine cinematics, motion graphics and social content for PC, console, VR and mobile games, for clients including King, Dream Games and MobilityWare. I also design UI and store screens and build for the web, with an MSc in Interactive Digital Media from Trinity College Dublin, so I work easily with game, UI and engineering teams.

SKILLS

Marketing art: key art, ad creatives, video ads, user acquisition (UA) creatives, social media content, app store screenshots, store screens, trailers, cinematic stills, community and live-ops event art, branding, logo design, typography, internal communications

Motion, audio and 3D: Adobe After Effects, Premiere Pro, motion graphics, 2D animation, sound design, music, camera animation, in-engine cinematics, Blender, Maya, Unreal Engine, Unity

Design tools: Adobe Photoshop, Illustrator, Figma, UI design, UI icons

AI tools: Nano Banana Pro (Gemini 3 Pro Image), ElevenLabs, ChatGPT, Claude

Web: WordPress, HTML5, CSS3, JavaScript, TypeScript, React, React Native

Collaboration: Agile, Jira, Trello, Asana, Notion, project management, mentoring

EXPERIENCE

Senior Marketing Artist, AdLiven
Remote, Dublin, Ireland | Dec 2025 – Present

- Create video ads and screen designs for full advertising campaigns for mobile game clients including King, Dream Games and MobilityWare, from concept to delivery.

Senior Designer, PixelHelix
Remote, Berlin, Germany | Oct 2024 – Sep 2025

- Led creative direction for game marketing assets and brand campaigns.
- Produced cinematic stills, motion graphics and interactive promotional visuals.

Marketing Artist, Meta Reality Labs
Remote, Berlin, Germany | Aug 2022 – Aug 2024

- Created key art and scene compositions for Crayta's in-game seasons, game jams, ad campaigns and social media, on the Epic Games Store and Facebook Gaming.
- Produced in-engine cinematics for Crayta's Epic Games Store presence.
- Moved with Horizon Worlds from VR to its web and mobile version, creating release visuals and collaborating on video content.
- Designed UI icons, store screens and in-game rewards such as stickers in Figma, with the game design and UI teams.
- Designed community announcements, stream layouts and social posts, plus internal communications.

Marketing Artist, YAGER Development
Berlin, Germany | May 2019 – Jul 2022

- Created cinematic still scenes for DLCs, press releases, game events, social media, announcements and ad campaigns for The Cycle and The Cycle: Frontier.
- Animated each season's key art for social ads and game trailers.
- Built in-engine cinematic clips and 3D animations, plus 2D animation, for trailer productions.
- Refreshed the game's branding and logo each season, and designed website layouts that I built in WordPress.
- Designed UI icons and UI screens for DLC releases, plus internal communications and community content.

Graphic Designer, FunRock Games
Remote, Stockholm, Sweden | Oct 2017 – Feb 2018

- Designed promotional and social ad campaigns, in still and video formats, for the mobile strategy game Heroes United in the MENA region.
- Kept branding and typography consistent across campaign and community assets.

Graphic Designer and Illustrator, Technology Resources EST
Alexandria, Egypt | Jun 2016 – Jun 2017

- Created brand identities and UI for the company's mobile apps and for MENA clients, plus print media for events.

Earlier roles
Teaching Assistant, Visual Communication, Alexandria University (Sep 2016 – Mar 2018); Graphic Designer, Vital Advertising and ONE.3 Advertising, Alexandria, Egypt (Dec 2015 – Jun 2016), creating brand identities for healthcare, real estate and food clients

SELECTED PROJECTS

MODU, gamified 3D furniture assembly mobile app | 2026
MSc team project, Trinity College Dublin | Project Manager and Full-Stack Developer | Website: modugamified.vercel.app

- Led a six-person team from concept to a public launch at the IDM Showcase in August 2026, including the launch posts.
- Created all of the app's sound effects and music, using ElevenLabs alongside my own production.
- Designed and built the product's promotional website on my own: a responsive one-page site with a video demo and team showcase, matching the app's visual identity.
