SUMMARY

Product and interaction designer, with a background in visual and interface design for games at Meta Reality Labs and YAGER. I design accessible mobile and web products from research through to shipped interfaces: states, flows, feedback, and the moments when a system should step in or stay quiet. I build what I design, in React Native and TypeScript, so behaviour gets tested on real devices with real people rather than described in a flat file. My MSc research at Trinity College Dublin was on reducing cognitive load in 3D interfaces, which taught me to treat accessibility as engineering rather than a checklist: the guidance itself adapts to the person, not just the contrast and type size.

SKILLS

Product and UX design: UX design, interaction design, visual design, UI design, prototyping, Figma, user research, surveys, accessibility, responsive design, design systems, design tokens, reusable UI components

Front-end development: TypeScript, JavaScript, React, React Native, Expo, HTML5, CSS3, WordPress, Node.js, Express, SQL, MySQL, Supabase, Socket.io, Git

AI-assisted design and development: Claude, ChatGPT, ElevenLabs, Nano Banana Pro (Gemini 3 Pro Image)

Visual, motion, audio and 3D: Adobe Photoshop, Illustrator, After Effects, Premiere Pro, sound design, music, Blender, Maya, Unreal Engine, Unity

Collaboration: Agile, Jira, Trello, Asana, Notion, project management, stakeholder communication, mentoring

PRODUCT DESIGN EXPERIENCE

Project Manager and Full-Stack Developer, MODU (MSc team project)
Trinity College Dublin, Dublin, Ireland | May 2026 – Aug 2026
Gamified 3D furniture assembly mobile app (Android and iOS) for cognitive accessibility

- Designed four guidance profiles that change how the whole experience behaves rather than sitting in a settings menu, with an onboarding questionnaire that recommends one and a mirrored layout for left-handed players.
- Designed a shared design-token theme and reusable UI components used across onboarding, assembly, catalogue and room screens, reused on the product website.
- Ran user testing with five participants, three of them neurodivergent, and cut the tutorial from fifteen steps to nine on the evidence; at the IDM Showcase in August 2026 it ran on six devices over two days for more than 100 testers, and 87% of tracked players finished all four builds.
- Led a six-person team across design, UX, narrative, 3D and engineering, built the interface in React Native, TypeScript and Expo on Supabase, and created all of the app's sound effects and music.

Web Designer and Front-End Developer, MODU website (MSc team project)
Trinity College Dublin, Dublin, Ireland | Aug 2026 | Website: modugamified.vercel.app

- Designed and built the site on my own in HTML, CSS and JavaScript, with no framework or build step.
- Reused the app's design tokens and typography, so the product and its website share one visual system.
- Built in accessibility (WCAG AA contrast, alt text, labelled links, reduced-motion support) and tested it at phone, tablet and desktop widths.

Development Lead, Atlasphere (MSc team project)
Trinity College Dublin, Dublin, Ireland | Jan 2026 – Apr 2026 | Live web app: atlasphere.up.railway.app
Real-time group trip planning web app

- Led full-stack development in React, Vite, Node.js, Express and MySQL, deployed on Railway.
- Built a drag-and-drop itinerary with real-time sync over Socket.io, group chat, voting notifications, email verification, password reset and server-side image resizing.

Front-End Developer, Retelling Dubliners (MSc team project)
Trinity College Dublin, Dublin, Ireland | Jan 2026 – Mar 2026 | Website: retellingdubliners.com

- Built the front end with accessibility considered from the start.

PROFESSIONAL EXPERIENCE

Senior Marketing Artist, AdLiven
Remote, Dublin, Ireland | Dec 2025 – Present

- Create video ads and screen designs for full campaigns for mobile game clients including King, Dream Games and MobilityWare, from concept to delivery.

Senior Designer, PixelHelix
Remote, Berlin, Germany | Oct 2024 – Sep 2025

- Led creative direction for game marketing assets and brand campaigns, including interactive promotional visuals.

Marketing Artist, Meta Reality Labs
Remote, Berlin, Germany | Aug 2022 – Aug 2024

- Designed UI icons and store screens in Figma, working with game design and UI teams.
- Created in-game rewards for Horizon Worlds, and moved with the product from VR to its web and mobile version.
- Created key art and scene compositions for Crayta seasons, game jams and campaigns, working with developers in an agile production pipeline.
- Produced internal communications and community content alongside external campaigns.

Marketing Artist, YAGER Development
Berlin, Germany | May 2019 – Jul 2022

- Designed UI icons and UI screens for DLC releases of The Cycle and The Cycle: Frontier.
- Designed website layout mockups for each season and built them in WordPress, alongside the seasonal rebrand of logos and key visuals.
- Built in-engine cinematics and 3D and 2D animation for trailers, plus key art for DLCs, events and ads.
- Produced internal communications and community content alongside external campaigns.

Graphic Designer, FunRock Games
Remote, Stockholm, Sweden | Oct 2017 – Feb 2018

- Designed social ad campaigns for the mobile game Heroes United, in still and video formats.

Graphic Designer and Illustrator, Technology Resources EST
Alexandria, Egypt | Jun 2016 – Jun 2017

- Worked with product managers and front-end designers on brand identities and UI for the company's mobile apps.

Earlier roles
Teaching Assistant, Alexandria University (Sep 2016 – Mar 2018); Graphic Designer, Vital Advertising and ONE.3 Advertising, Alexandria, Egypt (Dec 2015 – Jun 2016)

EDUCATION

MSc Interactive Digital Media, Trinity College Dublin
Dublin, Ireland | 2025 – 2026 | 78%

- Research: The Gamified Visual Scaffolding Framework, reducing cognitive load and improving accessibility in web-based 3D learning environments.

BFA (Hons) Visual Communication, Alexandria University
Alexandria, Egypt | 2011 – 2016

COURSES

HTML, CSS and JavaScript: Building the Web (2025); JavaScript Essential Training (2024); UX Designer from Scratch, Interaction Design Foundation (2020)

LANGUAGES

English (C1), Arabic (Native), German (B2), Italian (A2)
